## WISCONSIN NOTICE AND CONSENT FOR HUMAN IMMUNODEFICIENCY TESTING

### Request For Consent For Testing

To evaluate your insurability, United Home Life Insurance Company (Insurer) requests that you be tested to determine the presence of human immunodeficiency virus (HIV) antibody or antigens. By signing and dating this form, you agree that this test may be done and that underwriting decisions may be based on the test results. A licensed laboratory will perform one or more tests approved by the Wisconsin Commissioner of Insurance.

### Pretesting Consideration

Many public health organizations recommend that, if you have any reason to believe you may have been exposed to HIV, you become informed about the implications of the test before being tested. You may obtain information about HIV and counseling from a private health care provider, a public health clinic, or one of the AIDS service organizations on the attached list. You may also wish to obtain an HIV test from an anonymous counseling and testing site before signing this consent form. The Insurer is prohibited from asking you whether you have been tested at an anonymous counseling and testing site and from obtaining the results of such a test. **For further information on these options, contact the AIDS Resource Center of Wisconsin (ARCW) hotline at 1-800-334-2437 or visit [arcw.org/about-us/locations/](http://arcw.org/about-us/locations/).** If there is no staff or volunteer available, individuals calling will be transferred to the national hotline at the Center for Disease Control Info which is 1-800-232-4636.

### Meaning Of Positive Test Results

This is not a test for AIDS. It is a test for HIV and shows whether you have been infected by the virus. A positive test result may have an effect on your ability to obtain insurance. A positive test result does not mean that you have AIDS, but it does mean that you are at a seriously increased risk of developing problems with your immune system. HIV tests are very sensitive and specific. Errors are rare but they can occur. If your test result is positive, you may wish to consider further independent testing from your physician, a public health clinic, or an anonymous counseling and testing site. **HIV testing may be arranged by calling the ARCW at 1-800-334-2437 or visit [arcw.org/about-us/locations/](http://arcw.org/about-us/locations/).**

### Notification Of Test Results

If your HIV test result is negative, no routine notification will be sent to you. If your HIV test result is other than normal, the Insurer will contact you and ask for the name of a physician or other health care provider to whom you may authorize disclosure and with whom you may wish to discuss the test results.

### Disclosure Of Test Results

All test results will be treated confidentially. The laboratory that does the testing will report the result to the Insurer. If necessary to process your application, the Insurer may disclose your test result to another entity such as a contractor, affiliate, or reinsurer. If your HIV test is positive, the Insurer may report it to the Medical Information Bureau (MIB, Inc.), as described in the notice given to you at the time of application. If your HIV test is negative, no report about it will be made to the MIB, Inc. The organizations described in this paragraph may maintain the test results in a file or data bank. These organizations may not disclose the fact that the test has been done or the results of the test except as permitted by law or authorized in writing by you.

### Consent

I have read and I understand this notice and consent for HIV testing. I voluntarily consent to this testing and the disclosure of the test result as described above. A photocopy or facsimile of this form will be as valid as the original.

## RESOURCES FOR PERSONS WITH A POSITIVE HIV TEST

**AIDSLine - The Wisconsin HIV/STD/Hepatitis C Information and Referral Center (IRC)** hotline and website provide easily accessible information and referrals for people diagnosed with HIV, STDs, or Hepatitis C, people at risk for HIV, STDs, or Hepatitis C, and organizations providing services to these people. People will have access to IRC information and referrals, including testing sites, through a statewide toll-free hotline and a dedicated website. To contact the IRC, call **1-800-334-2437**, online at [arcw.org/aidsline/](http://arcw.org/aidsline/), or e-mail your questions to [irc-wisconsin@arcw.org](mailto:irc-wisconsin@arcw.org) or [AIDSLine@arcw.org](mailto:AIDSLine@arcw.org). The IRC is a program of the AIDS Resource Center of Wisconsin (ARCW). If there is no staff or volunteer available, individuals calling will be transferred to the national hotline at the Center for Disease Control Info which is 1-800-232-4636.

**AIDS Resource Center of Wisconsin (ARCW)** provides direct support services to people living with AIDS and HIV infection. Services through ARCW's Appleton, Beloit, Eau Claire, Green Bay, Kenosha, La Crosse, Milwaukee, Superior, and Wausau offices include primary medical care, medical referrals, financial assistance, housing and rent assistance, legal counsel, comprehensive case management, food and nutritional assistance, emotional support, referral for pastoral care, assistance with daily living needs, and support groups. Services through ARCW's Madison office include financial assistance, housing and rent assistance, and legal counsel. Call, visit, or write the AIDS Resource Center of Wisconsin (ARCW) near you. To contact the AIDS Resource Center of Wisconsin, call 1-800-359-9272, visit the website at [arcw.org/about-us/locations/](http://arcw.org/about-us/locations/) or e-mail your questions to [info@arcw.org](mailto:info@arcw.org).

## THE IMPLICATIONS OF TESTING POSITIVE FOR HIV

**A positive test result is not a diagnosis of AIDS.** A positive test means that you have HIV infection. Like people with other chronic medical problems, people with HIV infection have a spectrum of conditions, ranging from no symptoms to very serious ones. Over time, most people with HIV infection progress along the spectrum toward more serious symptoms. **However, both improved medical management and many options for self-care now provide new hope for people with HIV infection.** Anti-viral drug therapy and preventive antibiotics can delay progression of HIV infection and postpone or modify complications.

**It is extremely important to find a knowledgeable, experienced, and supportive health care provider to work with you in evaluating and managing your HIV infection.** If you do not know whom to see, consult the AIDS Resource Center of Wisconsin (ARCW) for the location of your local AIDS Resource Center for a recommendation or call the AIDS Resource Center of Wisconsin (ARCW) hotline to obtain a referral. **In Wisconsin, call 1-800-334-2437 or e-mail [irc-wisconsin@arcw.org](mailto:irc-wisconsin@arcw.org) or visit [arcw.org/about-us/locations/](http://arcw.org/about-us/locations/).** If there is no staff or volunteer available, individuals calling will be transferred to the national hotline at the Center for Disease Control Info which is 1-800-232-4636.

**Your health care provider can perform periodic examinations and arrange for appropriate tests to help you decide what treatments and interventions you may want to use.** Many people with HIV infection are being successfully treated with anti-viral drugs such as zidovudine (AZT) to slow the progress of the infection. Depending on the results of certain tests of your immune system, you may also benefit from therapies to prevent some infections. People with HIV infection also need regular tuberculosis (TB) screening and certain vaccinations. You and your health care provider can work out a schedule of follow-up visits appropriate for you.

**You may also want to utilize some self-care options and nonmedical therapies.** A nutritious diet, regular exercise, restful sleep, stress reduction, and spiritual peace (which are important for everyone) are even more helpful for many people with HIV infection. Some people with HIV infection find strength in meditation, massage, and specialized diets. If you are HIV positive, it is healthier to avoid alcohol and recreational drugs because they may damage your immune system.

**A positive test result may mean you have to make changes in certain areas of your life.** It is much easier to make these adjustments with the help and support of others. There are support groups and counselors at most AIDS service organizations. You might seek support from your partner or trusted friends, family, clergy, or health professionals.

**Counseling can help you put things in perspective.** Some people who test positive find counseling assists them in handling social and intimate relationships, dealing with fear, and promoting self-esteem. Professional counseling can help lessen the effects of the numerous issues you may face.

**You have a responsibility to yourself and others to avoid transmitting the virus.** Counselors can help you sort out your feelings about intimate relationships and help you learn about HIV risk-reduction methods. Not only should you avoid infecting others, but you should also avoid getting reinfected. Getting reinfected may help speed up the process of the HIV infection you already have.

**Being HIV positive means taking the right steps to maintain your health.** Dealing with the fear is healthier than avoiding the knowledge of HIV infection.

**For more information on HIV antibody testing and HIV related services, contact the AIDS Resource Center of Wisconsin at 1-800-334-2437 or e-mail [irc-wisconsin@arcw.org](mailto:irc-wisconsin@arcw.org) or [AIDSLine@arcw.org](mailto:AIDSLine@arcw.org) or visit [arcw.org/aidsline/contact\\_aidsline/](http://arcw.org/aidsline/contact_aidsline/).** If there is no staff or volunteer available, individuals calling will be transferred to the national hotline at the Center for Disease Control Info which is 1-800-232-4636.

Based on information contained in the brochure *The HIV Antibody Test*, produced by the American College Health Association.
